## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 19 and 20 are rejected under 35 U.S.C. 102(e) as being anticipated by Lyster (US 2003/00554559). Regarding claims 19 and 20, Lyster discloses a mode selector that sets a input mode 34 (fig. 1) and a electrotherapy delivery circuit 16 is configured as a voltage source or current source depending on the mode of delivery 310, 320, 410, 420 (fig. 3 and 4, sections 0012-0015, 0026, 0039, 0045-0049).

### ***Allowable Subject Matter***

3. Claims 1-18 are allowed.
4. The following is a statement of reasons for the indication of allowable subject matter: Regarding independent claims 1 and 10, of a external defibrillator including compensation of defibrillation current for cardiac shunt currents by adding impedance to energy delivery circuit or defibrillation current based on the detected mode of delivery of energy or defibrillation current has not been disclosed or suggested in the prior art when combined with the rest of the limitation of claims 1 and 10.
